¹ In the UK, in considering suicide events it is conventional to include cases where the cause of death is classified as either 'Suicide and self-inflicted injury' or 'Undetermined injury'. Since 2001, the ICD10 codes used for 'Suicide and self-inflicted injury' are X60-X84 and Y87.0 (ICD9 Codes E950-E959 for 1996-2000), and the ICD10 codes used for 'Undetermined injury' are Y10-Y34 and Y87.2 (ICD9 Codes E980-E989 for 1996-2000).

Note: All deaths data supplied by Demography and Methodology Branch is based on the year of registration rather than the year of occurrence, unless otherwise stated. Events such as suicide are likely to be referred to the coroner. This can take some time therefore deaths recorded each year may have occurred prior to the registration year.

^P Data for 2008 remains provisional until the publication of the 2008 Annual Report of the Registrar General due to be released in December 2009
